

## Features

- **Built-in Transformer:** Isolates the output signal from the input to prevent interference and distortion.
- **Noise Elimination:** Effectively removes unwanted noise caused by ground loops, hum, and buzz, ensuring pure audio transmission.
- **Stereo & Passive Operation:** The DI-Gadget operates in stereo and is passive, meaning no external power or battery is needed.
- **Designed for Modern Gadgets:** Works seamlessly with modern devices like tablets, smartphones, laptops, and PCs, making it a versatile and essential tool for live sound, studio, or on-the-go use.
